PRO-BAKER

PRO-BAKER, a cloud-based app using the secure MQTT protocol, centralizes oven management remotely. Each oven connects via Wi-Fi or LTE for reliable, encrypted communication. Through a secure browser login, users can monitor, update, and optimize all connected ovens. The platform supports remote updates, real-time monitoring, data analytics, and simplified service with error tracking and maintenance tools. It also enables quick creation and transfer of baking programs, while visual tools ensure intuitive access. By combining remote service with smart program control, PRO-BAKER reduces downtime and costs, guarantees consistent quality, and provides full visibility anytime, anywhere.

Why PRO BAKER Manager?

- **All ovens in one place - one dashboard**
- **Track user activity & permissions**
- **Maintenance & diagnostics**
- **Saving time**
- **Saving money**
- **Avoid problems**

Program Management

The module provides a complete overview and management of all baking programs with images, key parameters, and search filters, enabling users to create, edit, print, and transfer individual or multiple programs between ovens or users, visually organize them in grid or list views, and mark favorites for quick access.

Users Management
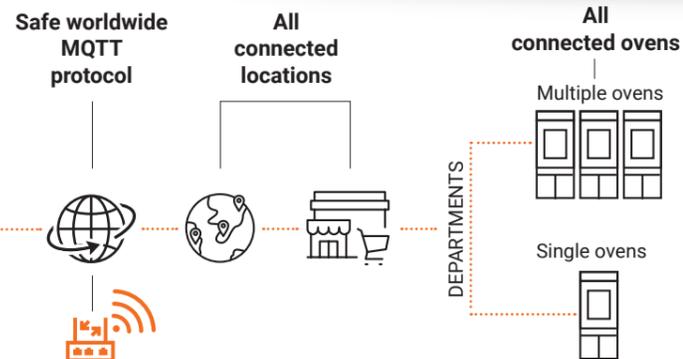

Regions & Location Mangement

Ovens Mangement

Service Mangement

Cleaning Mangement

Central control & statistic report for all your bakery devices

Safe worldwide MQTT protocol

All connected locations

All connected ovens

Multiple ovens

DEPARTMENTS

Single ovens

From baking to data — always on, always in control. Easy to use

Statistical Report

Easily select and filter ovens for analysis and access detailed Event or Summary Reports showing cycles, energy, water, and detergent consumption, together with the current status of the softener filter.

Saving time, money & energy with PRO BAKER

Synchronized Programs

Create stunning baking programs with images and notes, then instantly send them to one or multiple ovens. Effortlessly share between users or upload an entire program set in just one click.
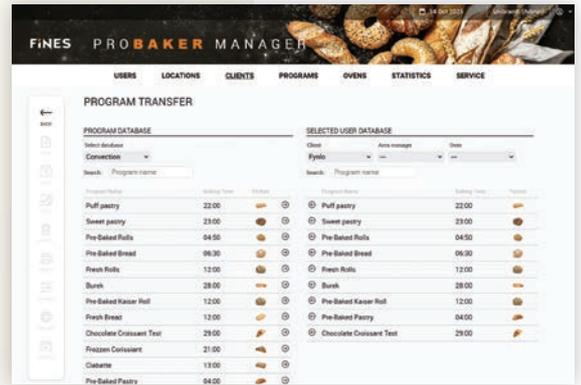

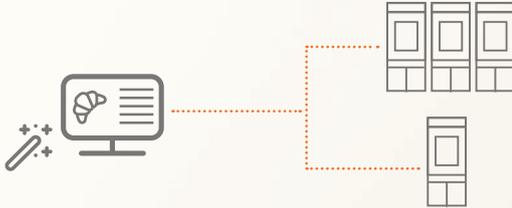

Fleet and Locations

Easily organize your ovens by regions and locations, assign users and roles, and stay in control with a real-time overview of what's online and currently baking.
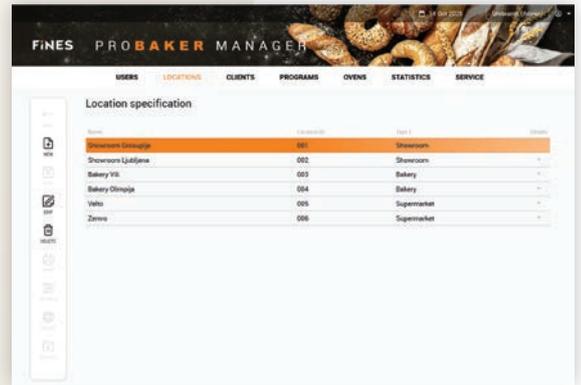

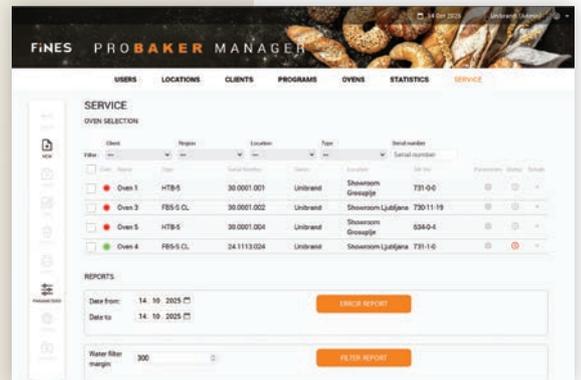

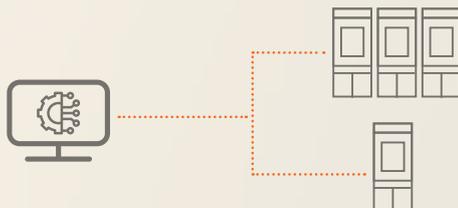

Analytics and Costs

Get powerful insights with detailed reports showing baking cycles, energy, water, and detergent consumption — including cleaning and water softener status. Add local pricing to instantly see real operating costs and cleaning efficiency for each location.
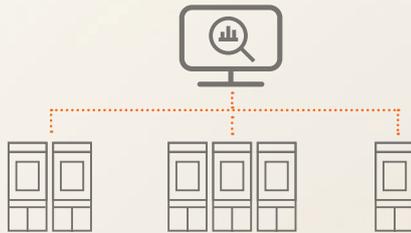

Service and Updates

Stay efficient with automatic updates, real-time monitoring, and remote diagnostics that minimize downtime, reduce service costs, and keep your ovens running flawlessly.
